

Five Impact Factors on Berlin S-Bahn Delays in 2024

1

STRIKES

Strikes in March, June and November cause delays **10x** longer than average.

2

PEAK TIMES

- **92%** of peak hour trips have delays.
- Weekdays have **3x** more delays than weekends.

5

LOCATION

Trains starting at a major hub have delays with durations **25%** longer than non-hub starting stations.

DELAYED TRIPS

- **80%** of trips are delayed.
- **96%** of delayed trips are short – under 5 minutes.
- Delays average 3.47 minutes.

4

NETWORK ROUTE

The circular Ring Bahn accounts for **42%** of delayed trips, significantly more than the north-south and east-west lines.

3

WEATHER

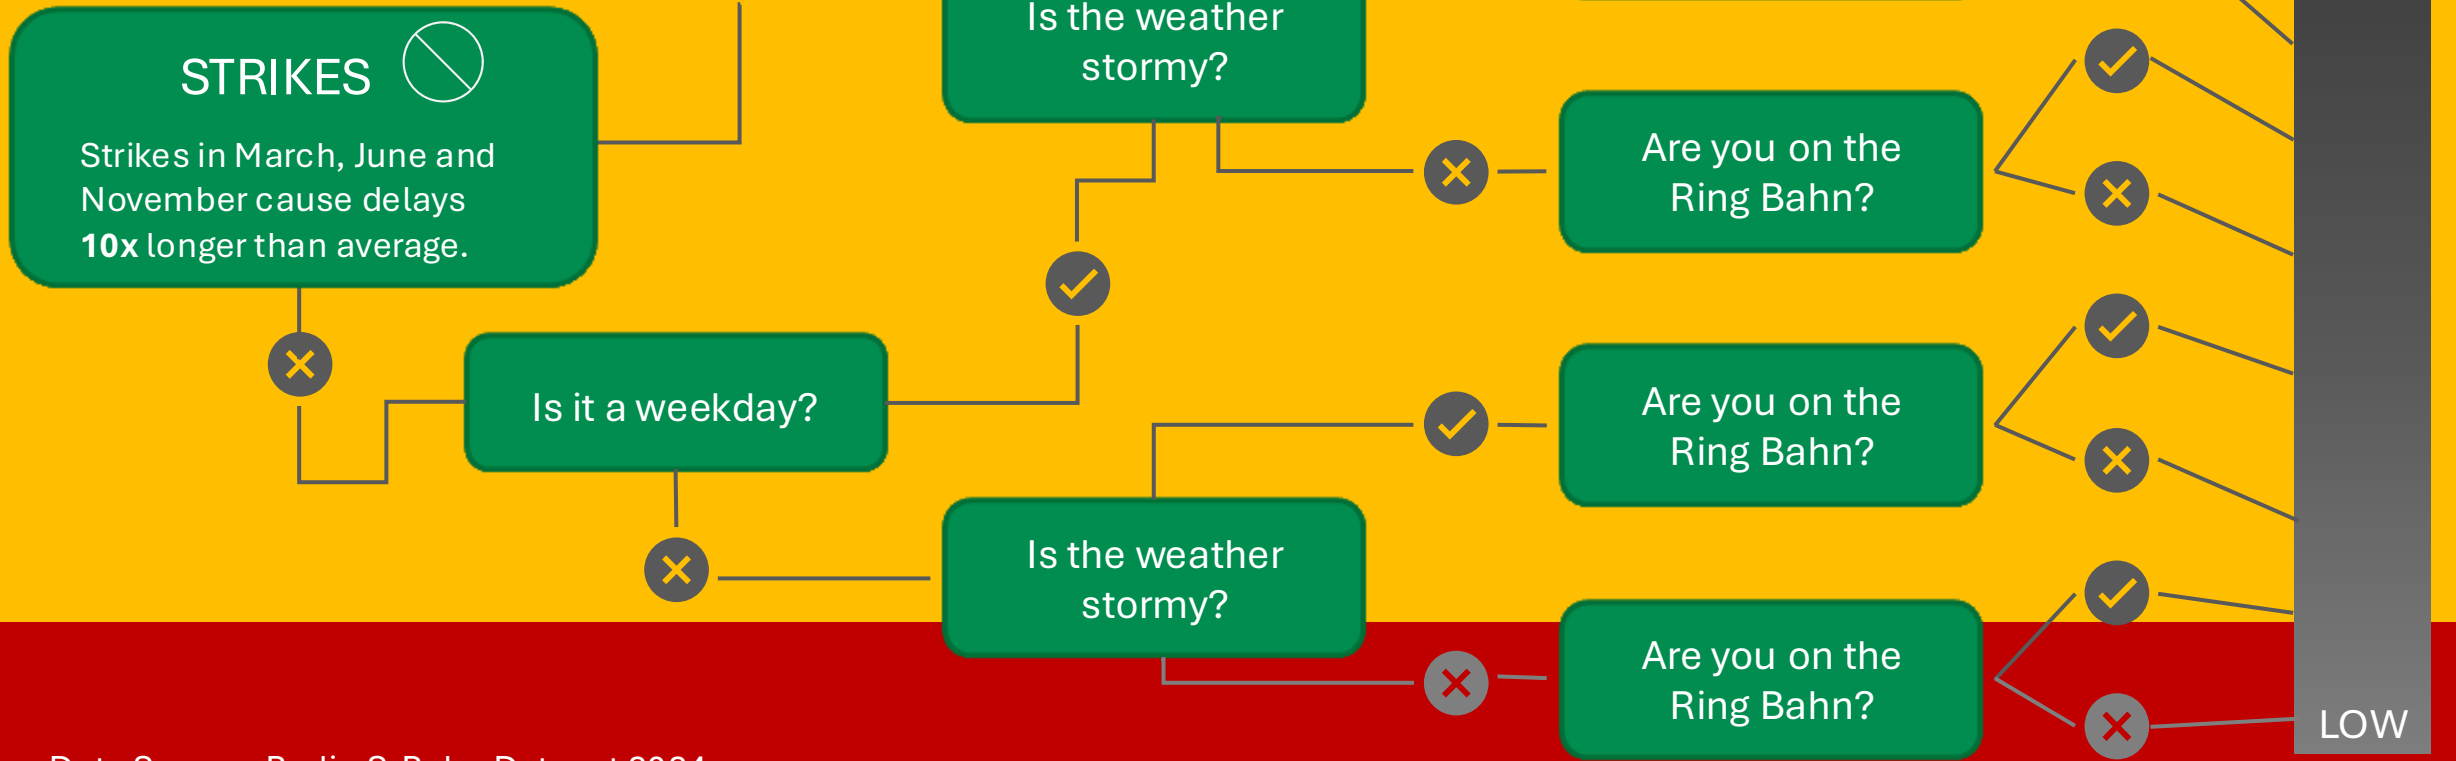

Due to high wind-speed, **12%** of trips are delayed on stormy days.
